MITCHELL'S

SCHOOL ATLAS:

COMPRISING THE

MAPS AND TABLES DESIGNED TO ACCOMPANY

MITCHELL'S SCHOOL AND FAMILY GEOGRAPHY.

MAPS.

1. World Equatorial Projection.
2. World Polar Projection.
3. Antarctic Regions.
4. North America.
5. United States, and a part of Mexico and Canada.
7. New Brunswick, Nova Scotia, and Newfoundland.
8. New England States.
9. Vicinity of Boston and Providence.
10. Vicinity of New Haven and Hartford.
11. Middle States.
12. Southern States.
13. State of Texas.
14. Western States.
15. Michigan and Wisconsin.
16. Mexico, Central America, and the West Indies.
17. Isthmus of Nicaragua.
18. Isthmus of Tehuantepec.
19. South America.
20. Isthmus of Panama.
21. Europe.
22. Great Britain and Ireland.
23. Germany, Switzerland, and Northern Italy.
24. France, Spain, Portugal, and Italy.
25. Greece and the Ionian Islands.
26. Asia.
27. Palestine, or the Holy Land.
28. Africa.
29. Egypt.
30. Republic of Liberia.
31. Oceanica.
32. Sandwich, or Hawaiian Islands.

GEOGRAPHICAL AND STATISTICAL TABLES.

1. Statistics of Physical Geography, showing the area of the principal Islands and Lakes, heights of Mountains and Volcanoes, and length of principal Rivers in the world.
2. Extent and population of the different countries in the world.
3. Population of the principal cities of the world.
4. Area and Population, Civil and Political Statistics, and Religious Denominations of the United States, in 1850.
5. Agricultural Products, and Manufactures of Cotton, Iron, and Wool, in the United States, by the Census of 1850.
6. Historical and Educational Statistics of the United States.
7. Railroads and Canals in the United States.
8. Population of all the counties of the Eastern, Middle, and Southern States, by the census of 1850.
9. Population of all the counties of the Western States, by the census of 1850.

GEOGRAPHICAL AND STATISTICAL TABLES---NO. I.

SURFACE OF THE EARTH.

The surface of the earth consists of unequal portions of land and water: the area of the former to that of the latter being nearly as 1 to 3. The land in the Northern Hemisphere greatly predominates over that in the Southern; if we consider the whole to be divided into 100 equal parts, that in the first will be represented by 78 such parts, and that in the other by 22.

The solid portions of the earth's surface consist of a number of detached sections, or islands, each being surrounded by water. The two larger masses are, for the sake of distinction, termed Continents; of which, one is the Eastern, and the other the Western. If the whole were divided as before into 100 equal parts, the two continents would be represented by 62 parts, and the islands by 18; or, in other words, the continental portion is about 44 times more extensive than the insular.

The terms Eastern and Western, in this case, refer to Ferro, one of the Canary Islands, and the westernmost land known to the ancients. Immediately after the discovery of America, the geographers of that age, in compiling their maps of the world, adopted the meridian of Ferro as the line of separation between the Eastern and Western Hemispheres. Ferro was then believed to be in longitude 20° west from Greenwich; but it is now known to lie some distance eastward of that meridian.

PRINCIPAL ISLANDS,

AMERICA.	Square miles.
Newfoundland	46,500
Cuba	42,000
Iceland	39,000
Hayti	23,000
Vancouver Island	13,500

ASIA—*Continued.*	Square miles
Ceylon	25,000
Formosa	15,000

AFRICA.	
Madagascar	225,000
Socotra	1,000

OCEANICA.	
Australia	3,120,000
Borneo	300,000
Papua, or New Guinea	200,000
Sumatra	160,000
New Zealand	95,000
Celebes	70,000
Luzon	50,000
Java	50,000
Mindanao	35,000
Van Diemen's Land	28,000
Hawaii	4,000

MOUNTAINS,

Mountains are classed according to their height in feet above the level of the sea. Those of the lowest class rank from 2,000 to 10,000 feet; those of the second, from 10,000 to 20,000; and those of the first class, from 20,000 upwards. Elevations under 2000 feet are commonly denominated hills.

For many years, Mount Dhawalageri, one of the Himalaya range, was regarded as the culminating point of the globe; but, in the year 1854, Mount Everest, an adjacent peak, was ascertained to be 1100 feet higher. Chimborazo was long considered the loftiest peak of the Andes; but in 1838, Sorato and Illimani, in Bolivia, were measured, and reported to be several thousand feet higher. Subsequently, however, it was found that an error in computing their elevation, greater than the alleged difference, was committed. Aconcagua, a volcano in the Chilian Andes, is now regarded as the most elevated point of land on the Western Continent.

The snow line, or line of perpetual congelation on mountains, is that part of the surface where the temperature is always at the freezing point; here the snow commences, and envelopes all the upper portion in a continual wintry covering. Under the Equator, the snow line is estimated at from 15,750 to 16,000 feet above the level of the sea; thence towards either pole, it gradually descends until it reaches the surface of the earth, which, in the Northern Hemisphere, occurs at about latitude 68°, and in the Southern at a somewhat lower parallel The exception to this is not at all cases uniform; it differs considerably, from local causes, in equal latitudes, and even on opposite sides of the same range of mountains. In latitude 20° it is estimated at about 12,000, in 40° at 9000, and in 60° at 5000 feet above the level of the sea.

Heights of the principal Mountains in the World.

NORTH AMERICA.	Feet
Mount St. Elias, Russian America	17,850
Popocatapetl, Mexico	17,735
Mount Brown, Rocky Mountains	16,000
Sierra Nevada, or Snowy Range of California	15,500
Mount Hood, Oregon Territory	18,361
Frémont's Peak, Rocky Mountains	13,570
Long's Peak, do.	12,500
Chasc Mountains, Hayti	8,000
Sierra del Cobre, Cuba	7,200
Black Mountain, highest of the Blue Ridge, North Carolina	6,470
Mt. Washington, White Mountains, New Hampshire	6,234
Mount Tahawus, or Marcy, New York	5,900

SOUTH AMERICA.	
Aconcagua, Chili	23,100
Chimborazo, Ecuador	21,420
Sorato, Bolivia	21,286
Chuquibamba, Peru	21,000
Tolima, New Grenada	18,200
Cerro de Potosi, Bolivia	16,150
Organ Mountains, Brazil	7,500

EUROPE.	
Elbrus, the highest of the Caucasus Mts., Russia	17,776
Mont Blanc, highest of the Alps	15,669
Mulhacen, highest of the Sierra Nevada, Spain	11,078
Mount Maladatta, highest of the Pyrenees	11,436
Monte Corno, or Cavallo, highest of the Apennines	10,154

Questions. What is said of the surface of the earth? The solid portions? Continents? How much does the continental exceed the insular portion? Which is the largest island in each of the divisions mentioned? The largest island in the world? Which division embraces the greatest number of large islands? What is said of mountains? Hills? Of Mount Dhawalageri? Kunchiuginas? Chimborazo? Sorato? Aconcagua? Which division of the Western Continent has the highest mountains? Of the Eastern Continent? Which is the highest mountain south of the Equator? Ans. Which is the highest insular mountain shown in the table? Or. What is said of volcanoes? Where are they found? How many are now known? Active? How many in America, &c.? In what country is the highest volcano? The highest

Heights of Mountains, continued.

EUROPE—*Continued.*	Feet.
Mount Scardus, highest of Balkan Mts., Turkey	10,000
Mount Ruska Poyana, highest of Carpathian Mts	9,912
Mount Etna, highest of Dofrafield Mts.	8,070
Konjakofski-Kamen, Ural Mts.	5,397
Ben Nevis, highest of Grampian Mts., Scotland	4,668
Snowdon, highest mountain in Wales	3,571
Macgillicuddy's Reeks, highest mountain in Ireland	3,404

ASIA.	
Mount Everest, Himalaya Mts.	29,100
Dhawalaghiri, do.	28,000
Hindoo Koo, or Koosh, Cabul	20,000
Mount Ararat, Turkey in Asia	17,210
Mount Lebanon, Syria, Jebel-Makmel	12,000
Mount Olympus, Turkey in Asia	9,100
Mount Sinai, Arabia	7,497

AFRICA.	
Abba Yared, Abyssinia	16,200
Piton des Neiges, Isle of Bourbon	12,500
Taiba Weha, Abyssinia	12,000
Mount Miltein, highest of the Atlas, Morocco	11,400
Snowy Mountains, Cape Colony	10,000
Pask of Pico, Azores	7,613

OCEANICA.	
Mount Ophir, Sumatra	13,842
Semero Mountain, Island of Java	13,000
Mount Otaheite, Georgian Isles	10,250
Mount Kosciusko, New South Wales	6,500
Mount Humboldt, Van Diemen's Land	6,520

VOLCANOES.

Volcanoes are mountains that are connected with the internal fires evidently existing beneath the surface of the earth, and to which they serve as chimneys, or vents. They are found in every quarter of the globe, from the island of Sea Mayen, in the extremity of the Northern Hemisphere, to Victoria Land, only 22° of latitude distant from the South Pole. Until recently, Volcanoes were supposed to exist only in the immediate vicinity of the Ocean; but it is now ascertained that there are several in the very centre of Asia, 1500 miles distant from any part of the sea. The number at present known is 427, of which 270 are active. In America there are 173 volcanoes, in Oceanica 163, in Asia 67, in Africa 17, in Europe 5, and in Victoria Land 2.

PRINCIPAL ACTIVE VOLCANOES.	Feet.
Gualatieri, Peru	21,997
Arequipa, or Guagua Putina, Peru	20,320
Antisana, Ecuador	19,140
Cotopaxi, Ecuador	18,887
Tchinchia, Ecuador	16,000
Klutchewskaja, Kamtschatka	15,763
Volcan de Fuego, Central America	14,000
Mauna Kea, Hawaii, Sandwich Islands	13,953
St Helen's, Oregon	13,300
Indrapura, Sumatra	12,500
Peak of Teneriffe, Canary Islands	12,182
Erebus, Victoria Land	12,400
Cartago, Central America	11,200
Etna, Sicily	10,874
Hecla, Iceland	5,110
Souffriere, Oundaloupe	5,108
Jorullo, Mexico	4,265
Vesuvius, Naples	3,948

THE OCEAN,

The Sea, or Ocean, is estimated to extend over a space of 150 million square miles, or three-fourths of the surface of the earth. The different parts are distinguished by various names; the most important being the Atlantic, Pacific, Indian, Arctic, and Antarctic Oceans. There are also various inland Seas, Bays, and Gulfs, of considerable extent; as the Mediterranean, Baltic, Caribbean and China Seas, the Gulf of Mexico, Hudson's Bay, the Bay of Bengal, &c. These are regarded as portions of the oceans with which they are connected.

The *Pacific Ocean* is that area of water bounded by America on the one side, and Asia and Australia on the other. Measured on the equator, it extends east and west 150 degrees of longitude, or about 11,000 miles, varying materially in width in other quarters. From north to south it occupies 125 degrees of latitude, reckoned from about the 60th parallel south to the 60th north, or about 8,700 miles, and has an area estimated at eighty-three million square miles.

The *Atlantic Ocean* occupies the space between Europe and North America, and Africa and South America, with about the same extent north and south as the Pacific. It is more than a third as large as the Pacific, the area being reckoned at 30 million square miles. Both these oceans are divided by the Equator into Northern and Southern.

The *Indian Ocean* extends from Africa to Australia, and from the shores of Asia southward to a line supposed to be drawn from the Cape of Good Hope to the southern extremity of Van Diemen's land. It is about one-fourth the size of the Pacific Ocean, having an area of 21 million square miles.

The *Arctic* or *Northern Ocean* includes the basin extending around the North Pole. The *Antarctic* or *Southern Ocean* comprises the tract of sea lying around the South Pole, and southward of the Atlantic, Pacific and Indian Oceans. The Arctic and Antarctic Oceans contain together about a ninth part of the waters on the globe; the first has an area of three million, and the other of thirteen million square miles.

LAKES.

Lakes are found in all quarters of the globe, but are more numerous in North America than elsewhere. The water of lakes is generally fresh; in a few instances it is salt, but varying in degree, being sometimes only slightly saline, or brackish. The Caspian and Aral, with some other lakes, are usually called seas, from their superior dimensions, and from their waters being salt, like those of the ocean.

In elevation and depression of level, also, lakes differ essentially. Among those remarkable for elevation of surface, are Lake Superior, 600 feet; the Lake of Brienz, 1,000; the Great Salt Lake, 4,200; and Lake Titicaca, 12,795 feet above the level of the sea. Among the most conspicuous of the depressed or sunken lakes, are the Caspian, Aral, and Dead Seas; the two former being sunk to the depth of about 83 or 84 feet each, and the latter to the depth of 1312 feet, below the level of the Mediterraneau.

Salt lakes have no outlet to the ocean; and, though they all receive fresh-water streams, yet, from the constant solar evaporation, their waters remain unchanged.

ESTIMATED AREAS OF SOME OF THE PRINCIPAL LAKES.

	Sq. miles.		Sq. miles.
Caspian Sea	145,000	Lake Erie	7,800
Sea of Aral	30,000	Lake Ontario	6,900
Lake Superior	31,600	Lake Winnipeg	6,500
Lake Michigan	23,150	Lake Ladoga	6,190
Lake Huron	23,100	Lake Nicaragua	4,000
Lake Baikal	14,000	Lake Titicaca	4,000
Great Slave Lake	11,800	Great Salt Lake	1,875

RIVERS,

Rivers may be classed either according to their length of course, or according to the extent of country drained by their waters. Regarded in the first point of view, the Mississippi, including its principal tributary, holds the highest rank; but if according to the second, the Amazon takes decided precedence of all other streams.

From the head of the Missouri, which rises on the east side of the Rocky Mountains, to the Balize at the mouth of the Mississippi, the entire stream, measured so as to include all its windings, is, according to one account, 4350, and, by another, about 4100 miles. But if estimated by the length of its valley, omitting all except the chief bends, the extent is not less than 2000 miles; being, in either case, the longest river in the world The Amazon in South America, and the Obe in Asia, each water valleys about 2500 miles in length, estimated so as to exclude the smaller windings. The basin or region drained by the Amazon and its tributaries, being the entire region enclosed by a line connecting the sources of all its branches, is estimated at 2,100,000 square miles, a tract of country equal to two-thirds the extent of Europe. The Obe, estimated in the same manner, drains a basin of 1,250,000 square miles; and the Mississippi and Missouri, a basin of 1,100,000 square miles in extent.

QUESTIONS.—Which State has the greatest number of counties? Which the least? Which of the Eastern States has the greatest number? Which the least? Of the Middle States? Southern? Western? How many counties has your own State? What is the population of the county in which you reside? Which is the most populous county in the United States? Which is the next in population? How many counties have a population of 100,000 and upwards? How many have a population of more than 50,000?

The track laid down in Map № 1 is that of the U.S. Exploring Expedition, in the voyage round the World performed in the years 1838, 39, 40, 41 and 42. The arrows indicate the direction sailed.

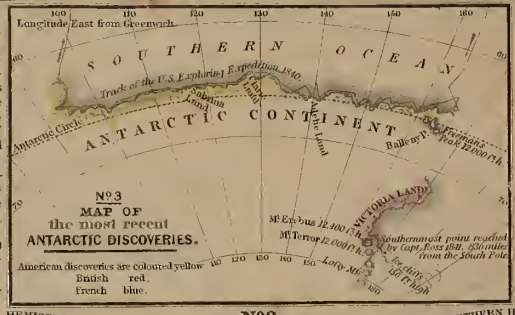
RECENT ANTARCTIC DISCOVERIES.

Until the year 1819, no land was known to exist to the southward of the 60th deg. of south latitude. In that year, South Shetland, in 1821 South Orkney, in 1831 Enderby's Land, in the year following Graham's Land, and in 1839 Sabrina Land, and the Balleny Islands, were all discovered by British navigators. In 1821, the islands of Alexander I. and Peter I. were discovered by the Russians.

In August 1838, the U. S. Exploring Expedition, consisting of the Vincennes, Peacock, and some smaller vessels, under the command of Lieutenant Charles Wilkes, sailed from Norfolk. On the 19th of January, 1840, a continent, situate about 2,000 miles south of Australia, was discovered by the expedition, and explored for a distance of 1,700 miles from East to West, comprising the greatest extent of land yet discovered in this quarter. On the same day, a part of the same coast was seen by Commodore D'Urville, with the French Exploring Corvettes, Astrolabe and Zelee.

In 1841, Captain J. C. Ross, commanding the British ships Erebus and Terror, discovered and explored a line of coast, extending southward to within 830 miles of the South Pole, being the nearest approach yet made to that point of the globe.

All these regions are barren and desolate and without inhabitants; the land is all the time covered with ice and snow, and the coasts are for the most part bordered with vast masses of ice. Mount Erebus, near the most southern point reached by Capt. Ross, is an active Volcano, 12,400 feet high. Mount Terror, in the vicinity, is 12,000 feet, and Freem...'s Peak, in one of the Balleny Islands, is about the same altitude.



Entered according to Act of Congress in the year 1852 by S. Augustus Mitchell in the Clerk's Office of the District Court of the eastern district of Pennsylvania

EXPLANATION.

The Capitals of Countries are represented thus ⊛
The figures attached to the Cities and Towns indicate the number of thousands of the population. thus New York 516 signifies 516 000 inhabitants.
The figures attached to the Rivers indicate the number of hundreds of miles of their length of course; thus the Mississippi River 11 signifies 1100 miles long.
The words underscored are the names of Indian Tribes.

REMARKS.
The West Indies comprise the Great Antilles, the Little Antilles, the Bahama Islands, and the Caribbee Islands.
The Great Antilles are Cuba, Havti, Jamaica, and Porto Rico.
The Little Antilles lie along the coast of Venezuela: of these Curacoa and Margarita are the largest.
The Bahama Islands lie north of Cuba and Havti, comprising Abaco, Eleuthera, Gumahani, and others.
The Caribbee Islands extend from Porto Rico to Trinidad, including the latter. Those which lie north of latitude 15° are called the Leeward, and those south, the Windward Is.
